Does this project involve: Yes No
 Human Subjects?
 IRB Approval Number

Vertebrate Animals? Yes No
 IACUC Number

Does this project involve (a) the use of proprietary materials (for example, materials that require an MTA, or a process, technique, or product that requires intellectual property protection), or (b) potential conflict of interest?

(a) Yes No

(b) Yes No

If yes, please explain.

Does your proposed CAT project necessitate the use, analysis, development, and/or refinement of **non-biological materials** as an integral component of your technology?

HV 1R

If yes, the Cornell Center for Materials Research (CCMR) can provide up to \$5,000 to match selected awarded CAT grants having materials-related needs. Please explain your needs below, and include your materials-related expenditures in the Budget section on page 4.

Visit <http://www.ccmr.cornell.edu/industry/cat-grants-for-nys-businesses/> for more information.

Have you previously received funding from the CAT?

Yes No

If yes, have past projects supported by the CAT led to any disclosures, patents, licenses, or new company formation, or leveraged new federal or corporate funding? Please explain.

Please attach your CV in the biosketch format used by NSF.

(For reference, see: https://www.nsf.gov/pubs/gpg/nsf04_23/2.jsp)

Please attach a document listing your current and pending grants (C&P).

Scientific Merit, Commercial Potential/Development Path, & Economic Impact

I. Scientific Merit

What is the goal of this project? Please describe in non-confidential terms in 2-3 sentences. Avoid scientific jargon.

Abstract/Summary – Please complete in Word and attach to this application. Use non-confidential descriptions only and follow this format (2,500 words maximum):

- Abstract
- Introduction
- Goals and objectives
- Experimental approach
- Application of your research
- Deliverables (measurable outcomes)

II. Market Potential of Product or Service and Pathway to Commercialization

(250 - 500 words suggested)

- a. Describe the **market potential** of your future product or service. Include:
 - Define the status quo for the problem
 - Tell how will your technology offer an improvement over the status quo
 - Explain competitors' products and services (Note: "doing nothing" for a certain healthcare situation may actually be the current status quo)
- b. Describe the **pathway to commercialization** that you and your company partner envision for your technology product or service. Include:
 - Information on your invention disclosure to Cornell's Center for Technology Licensing (CTL), or plans to disclose your inventions
 - Plans for scale-up of your technology in a commercial setting
 - How and when you will navigate any regulatory approval processes (USDA, FDA, EPA, etc.)
 - Testing in the hands of the consumer
 - Business strategy to get product/service to market
 - Reimbursement or insurance issues (only applies to human health care products)

III. Economic Impact in New York State (250 - 500 words suggested)

Economic impact refers to the growth in New York State that could result from the eventual commercialized product or service based on the technology that you propose in your CAT application. Discuss between faculty applicant and partner company.

Indicate the projected economic impact on the company partner of the proposed project over the next five years in terms of

- Jobs created and retained in New York State
- Increased corporate revenues (product sales, research contracts., etc.)
- Corporate savings
- Leveraged funding (SBIR/STTR, grants, Angel or VC investment, strategic partnerships)
- Include timelines that show when these impacts are expected. Attach your responses as a Word document.
